MOBILI METALLICI

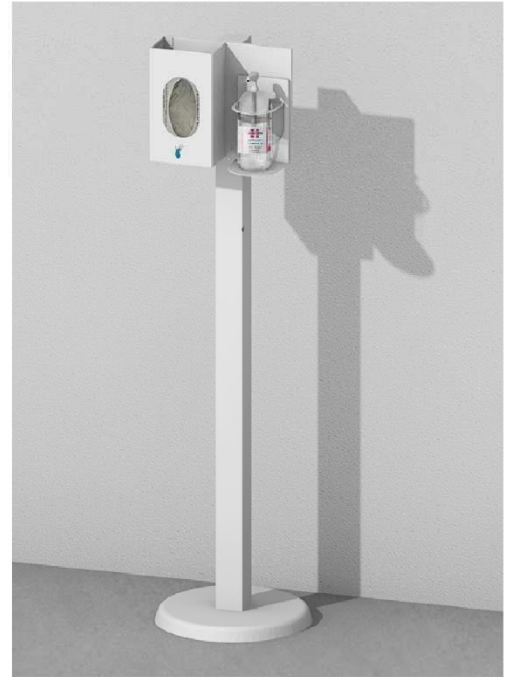

MADE IN ITALY

AL/M13

UV cabinet for professional use meant to keep sterile all the instruments previously sterilized by adequate means (autoclaves or other).

The cabinet is supplied with filtering glass for UV emission and with a micro switch that turns off the lamp when the door is opened.

INOX LINE

The line INOX FOCUS CABINETS is the ideal solution for the sterile environments. Made in stainless steel 304, Scotch-Brite finishing, thickness 8/10 and 10/10, it is supplied with steel soft-closing slides, highly resistant to load up to 25kg to support different levels of charge.

The slides are mounted on the bottom of the drawer and are supplied with soft-closing mechanisms. Inside the drawers, various types of non-toxic PST inserts can be added so that the material is organized in a neat and practical way.

AL/SAPC

Made in polyurethane of various colours. The back is slightly flexible, the seat is ergonomic and comfortable and easy to sanitize.

It is available with fixed base in chromed steel and levelling feet. For its correct sanitization, we recommend the usage of a solution of water and bleach (active chlorine) in a proportion of 0.5%.

This indication was given by the World Health Organization, specifically for the sanitization of surfaces in order to ensure the protection against the spread of COVID-19.
