3D LIBRARIES

Intra-oral scan and lab scan compatible, our scan bodies are very accurate and made of peek, a material that allows to scan without using dulling spray, and to make implant structures with high precision. Our library is free and technical drawings are open. This allows to realize your own work respecting the quality standards and our implants tolerances. The result is an easier workflow. The library is available for Exocad, 3Shape e Dental Wings modeling systems.

ADVANTAGES

HIGH PRECISION, WITH NO INVESTMENT

Dental labs are dealing with customized restoration services provided faster and with more attractive prices. iRES® Digital Solutions offers all inclusive CAD-CAM design products for all cases, from traditional implant-borne solutions to tooth-borne restorations, that you can easily order thanks to an user friendly online ordering system. You can get all iRES® quality customized prosthetics, no matter if you are more digital or traditional, and it doesn't require any extra investments in terms of machine, technology or training.

NO INVESTMENT

for the equipment
and related training

HIGH PERFORMANCE

get benefits immediately
from digital technology

PRECISION

highly precise

THE NEW GENERATION DIGITAL PLATFORM

SMARTGUIDE

iRES® **SmartGuide**® is the innovative and personalized solution for the entire clinical team dentistry that maintains strong ties with the dentistry of the future. iRES® offers to the dentists a valid system that meets all the patient's requirements through adequate and personalized solutions planned and achieved using the vast, modern range of Cad Cam technologies with certified materials and executed with absolute excellence. The iRES® system guarantees the right solution for every need, from

computer-assisted surgery with all the necessary required computer tools to all components for individual prostheses with 5 axes machine tools that carry out complex, individualized geometries with perfect results and all through only one source. The dentist uses iRES® **SmartGuide**® software and with a few simple steps develops his or her own simple treatment plan, if necessary by combining his or her own requisites with our Tutor to achieve personalized assistance.
