

Dental Devices™

the instruments company

*Making the world
A happier place!*

Manufacturers & Exporters of Dental & Orthodontic Instruments

COMPANY PROFILE

Dental Devices is a leading manufacturer of general dental instruments for all ortho; endo; periodontic; and implants specialisms, supplying worldwide markets.

Based from its manufacturing units in Sialkot city in Pakistan, the company continually invests to move forward with an increasing range of quality products using modern manufacturing processes, supplying standard and customer bespoke designs.

From over 50 years of experience in the supply of dental instruments this family run business, now managed by the second generation, has inherited the ethos of ongoing product development and testing meeting

all international quality standards of ISO 9001: 2000, ISO 13485:2003 GMP and CE.

Using best sourced imported materials our company is able to tailor our services to fulfill all customer's requirements for design, quality, delivery and price.

Working very closely with all of our established customers, often having started with trial orders, we are sure that we can demonstrate to you our abilities and commitment to support your future business requirements promptly with due diligence.
