# DRC GROUP

DISTRIBUTION RETAIL COMPANY

## Who are we?

THE DRC COMMERCIAL AND INDUSTRY GROUP IS A RUSSIAN MANUFACTURER OF ORAL CARE PRODUCTS, COSMETICS, PERSONAL HYGIENE AND MEDICINAL PRODUCTS.

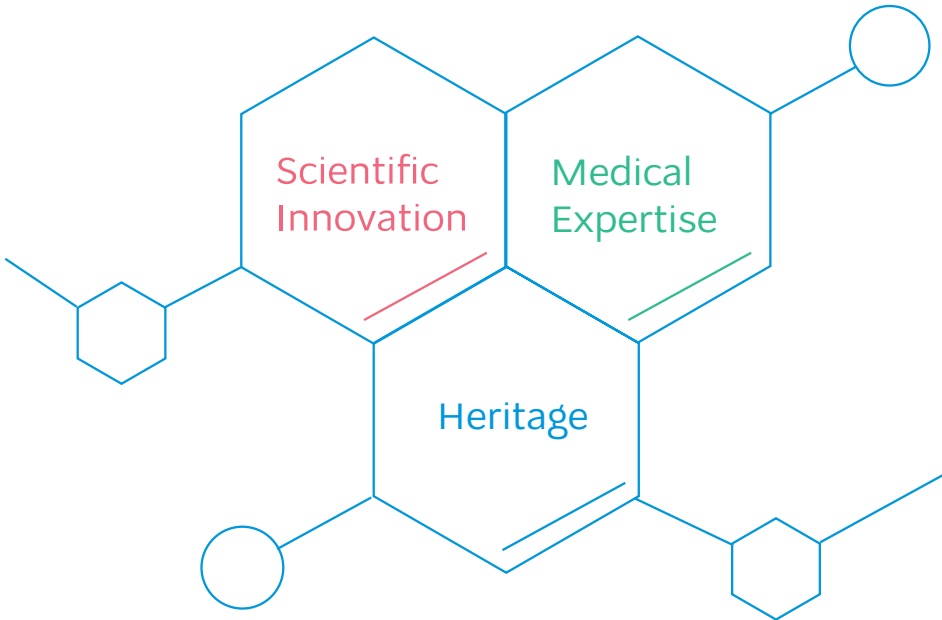

Our manufacturing process encompasses a full cycle from the inception of an idea for a product all the way up to its commercial launch and sales promotion.

We never release a product if it is not unique. We see no point in making something which already exists, because our strength is our powerful research potential and scientific intellect.

We are a R&D company in the full sense of the word. We create molecules and synthesize complex ingredients, which have never been synthesized before.

By producing unique products we bring the art of innovations to a completely different level which enables us to help improve people's health and quality of life.

## OUR BUILDING PILLARS

R&D

Manufacturing

Distribution

Promotion

# OUR HISTORY

17 years of success

2003

The decision to begin developing our own oral care products is taken.  
  
Creation of the WDS research laboratory.

2004

DRC group is founded.  
  
The “Evrokosmed” manufacturing plant in Domodedovo, Moscow, is acquired.

2005

The launch of our R.O.C.S.® brand oral care products range.  
  
Opening of the European branch.  
  
Our products are certified for the EU market.  
  
Successful clinical trials of the products are carried out in Finland.

2010

The start of land development in the Stupino Industrial Park in the Moscow Region.  
  
The only toothbrush manufacturing plant in all of Russia is commissioned in Udomlya.  
  
Pharmaceutical synthesis lab is founded.  
  
2 years’ research complete on prevention of dental disease in school-based fluoride-free toothbrushing program under the supervision of WHO expert.

2015

The launch of our “Evrokosmed-Stupino” modern manufacturing facility in the Stupino industrial park in the Moscow Region.  
  
Launch of Herpenox®.

2016

Exports to over 40 countries worldwide.  
  
Launch of Femegyl® Professional Cosmetics.  
  
Award No.1 in Pharmaceutical Retail Channel in Russia (ACNielsen Total Russia MJ2016).

2018

New modern manufacturing of toothbrushes and interdental products WDS-Stupino LLC. launched in the Stupino Industrial Park Moscow region, Russia

# OUR ACHIEVEMENTS AND ACTIVITIES

Synthesis of raw materials for own consumption

3 R&D Labs producing unique pharmaceutical molecules and complex ingredients

50 worldwide patents

Ownership of the following brands:  
R.O.C.S.® & Lapikka® (Oral care products),  
Femegyl® (Professional and pharmaceutical skin care products),  
Ivomed® (Intimate hygiene products),  
Argakol®, Herpenox® (Medicinal products)

Recurring international clinical research

Scientific reports and papers at international symposiums and in specialized press

Active participation in international industrial and professional exhibitions, practical and science workshops

## OUR MANUFACTURING PROCESSES ENCOMPASS

ISO-9001:2015 certification.

Modern storage and handling systems.

Use of natural active ingredients which are as biologically compatible as possible with human body and the environment.

Sustainable practices: the plant is unrivalled in eco-cleanliness and energy saving.

### THE ART OF INNOVATIONS

A unique low temperature toothpaste brewing technology.

Our toothpastes contain mineral complexes with bioavailable calcium, phosphate and magnesium as an alternative to fluoride.

# R.O.C.S.®

R.O.C.S.® provides special solution for every age based on age-related differences and risks of dental diseases.  
Selecting ingredients for our toothpastes, we give preference to natural raw materials. We have developed unique manufacturing technologies to preserve ingredients activeness and their beneficial properties.  
R.O.C.S.® possesses the technology of producing fluoride-free toothpastes which could be used as effectively as fluoride ones.

## BRAND ARCHITECTURE

By creating the R.O.C.S.® brand, we sat a new standard for the industry, with our distinguishing feature being that we take into account the physiological differences of various bodily exchange processes at different stages of human life.

R.O.C.S.® is the leader of the children’s oral care hygiene care segment and in 2016 was awarded No.1 Brand in pharmacy toothpaste and toothbrush sales in Russia (ACNielsen Total Russia MJ2016).

Over 10 patented formulations.

Over 50 clinical researches.

The world’s only fluoride-less toothpaste to have been clinically proven to be effective against caries.

# FEMEGYL®

The extensive range of professional and pharmaceutical skin care products was launched in 2016 following the development of various organic germanium compounds.

It includes unique injective contouring compounds and unparalleled chemical peels for the face which don't damage the skin and which can be combined with exposure to sun.

# ARGAKOL®

Unique drug for treating wounds of varying etiology at all stages of the wound healing process

## POTENTIAL AREAS OF USE:

- Surgery, including in the military
- Treating trophic ulcers, including in people with diabetes
- Prevention and treating of wound infections; isolation of wound surfaces of all etiologies
- Combustiology
- Dentistry, as well as periodontics
- Gynecology
- Dermatology and venereology
- Medical cosmetology
- Veterinary science

## UNIQUE BENEFITS:

- Multipurpose medicine – all effects in one product
- Can be used in all treatment stages, starting from prehospital treatment
- Can be used to treat the skin or the mucosa during intracavitary intervention
- Creates a “skin effect”
- Affordable price

# HERPENOX®

This unique compound is to be used for complex treatment and prevention of infectious and inflammatory conditions, including those caused by the herpes virus.

It can also be used for preventive treatment of infectious inflammation and for speeding up the healing process for wounds, microwounds, maxillofacial and gingival surgery, to prevent gum inflammation during the adaption period for dentures and other orthodontic appliances.

It reduces swelling, inflammation, pain, burning, tightening of the skin and itchiness during a herpes infection.

OUR SOCIAL RESPONSIBILITIES

We implement our social responsibility policy through various charity projects, targeted supply of drugs for needy, support of arts and cultural initiatives, support of children's sports.

We support arts through sponsorship of Cello music festival "VIVACELLO", music festival "VIVARTE", cultural and charitable foundation U-Art, various art festivals, Figure skating World Champion Evgeni Plushenko's sports shows, etc.

# OUR GLOBAL PRESENCE

Our distribution system is developing rapidly not only in Russia, but also abroad. We are working with the largest retail and pharmacy chains and have a presence in pharmacies and retail stores in more than 45 countries in the world.

Our company employs over 500 people globally.
