

NICE GLASS

RELIABILITY AND TECHNOLOGY,
ADAPTABLE TO EVERY SINGLE STYLE.

miglionico
DENTAL EQUIPMENT

MIGLIONICO, AN ALL ITALIAN STORY.

WE CAREFULLY SELECT THE BEST RAW MATERIALS AND TRANSFORM THEM TO CREATE OUR UNITS. WE WORK WITH PASSION AND COMMITMENT TO GUARANTEE QUALITY AND RELIABILITY OVER TIME.

Internal production

Our highly specialized staff, through the use of the most innovative software and mechanical technologies, create the units from the design to the quality control. We have CAD / CAM machines, laser cutting machines, press bending machines, numerical control lathes, polyurethane molding devices and welding devices. The internal and direct management of the entire production allows us to offer excellent products while remaining very competitive and versatile.

High quality materials

The key to quality lies in the choice of excellent materials. We combine innovation and solidity to guarantee reliable and resistant products. We only use excellent materials, such as aluminum and iron for the internal structure, painted polyurethane for external surfaces, glass for the display pannels and skay leather for the upholstery. Our goal is to offer you a solid product, easy to manage and sanitize, to make our units last over time.

NICE GLASS

RELIABILITY AND ADAPTABLE TECHNOLOGY
FOR EVERY SINGLE STYLE

TECHNOLOGY AT THE SERVICE OF FUNCTIONALITY AND SAFETY. SIMPLE AND VERSATILE IN USE, THANKS TO ITS CHARACTERISTICS IT GUARANTEES HIGH QUALITY STANDARD PERFORMANCE AND MAXIMUM HYGIENE.

OPERATOR SIDE

Everything, right at your finger tips

The operator control panel is adjustable and is equipped with an integrated negatoscope (X-ray film viewer). Thanks to its movement, it is possible to have the right view and the most convenient access of the display both while working in the standing up or in the seated position. The multifunction display with capacitive touch technology has a glass surface and is encapsulated in a painted polyurethane structure.

Giving space to your needs

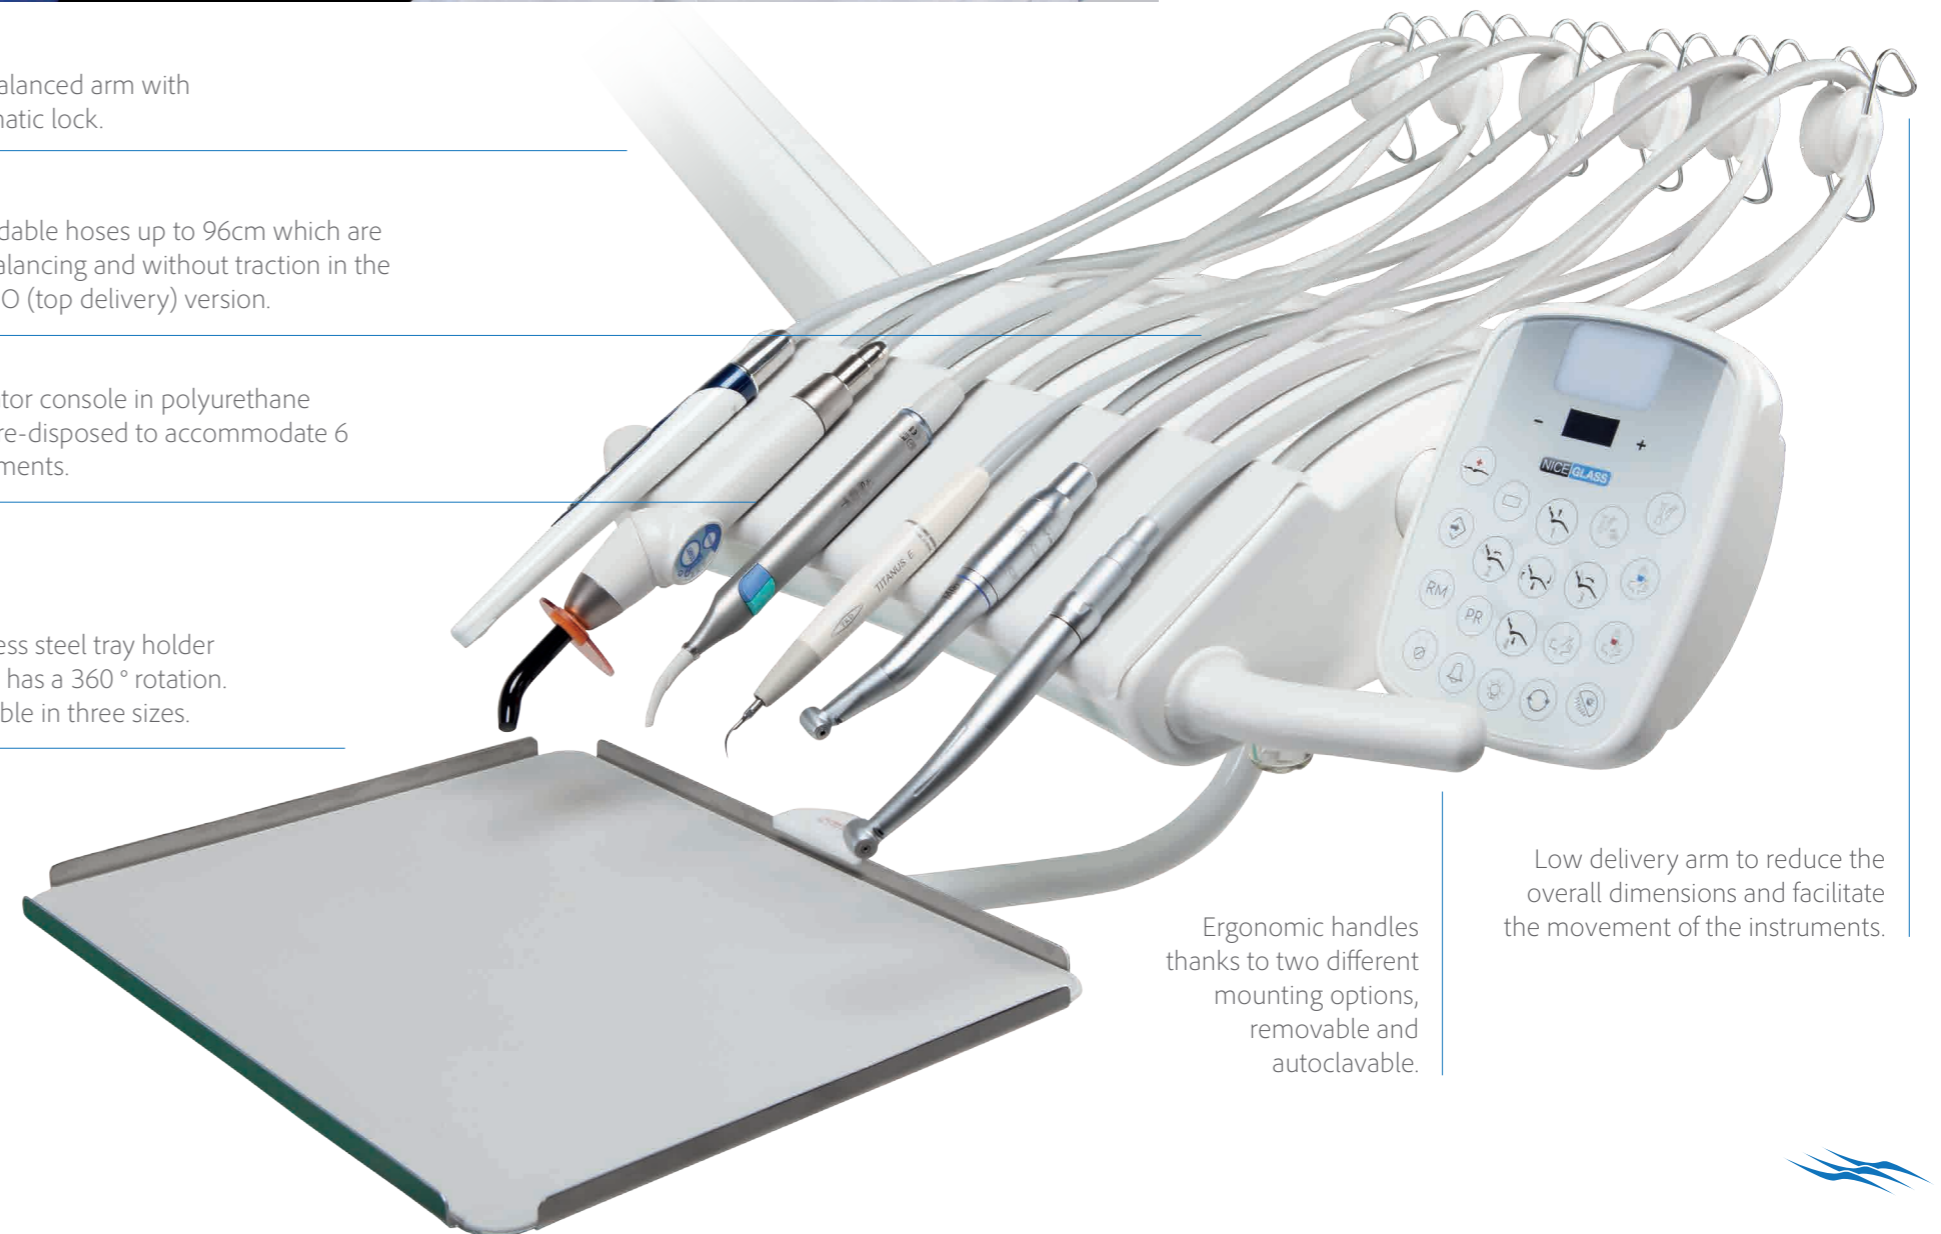

The operator side is designed to guarantee maximum ergonomics and ease of handling. The arm has a wide excursion that allows you to position the operator console in the most functional working position, while still maintaining its reduced dimensions. The console, designed to accommodate up to 6 instruments, is equipped with an automatic sensor activation when each handpiece is withdrawn from its position and a removable and autoclavable silicone instrument mat.

Self-balanced arm with automatic lock.

Extendable hoses up to 96cm which are self-balancing and without traction in the SPRIDO (top delivery) version.

Operator console in polyurethane and pre-disposed to accommodate 6 instruments.

Stainless steel tray holder which has a 360° rotation. Available in three sizes.

Ergonomic handles thanks to two different mounting options, removable and autoclavable.

Low delivery arm to reduce the overall dimensions and facilitate the movement of the instruments.

Only excellence is chosen

The operator's delivery console pre-disposed for 6 instruments can be customized according to the needs of the operator. All the modules are created in partnership with the main manufacturers of handpieces in the sector to guarantee reliability and technology. The best partners for the best products to offer you.

- Water rinse to cuspidor
- On / Off operator lamp
- Fiber optic lamp management
- Assistant call / door opener
- X-ray film viewer
- Activation and timer of hot or cold water to the glass

Simple commands

Managing the unit is simple and intuitive thanks to the glass display icons. With a simple touch it is possible to activate all the functions of the unit and set the desired parameters. Easy to sanitize thanks to the timed lock function.

Movement is freedom

The assistant delivery arm is mounted on a double articulation arm which allows to better manage the work area whether working alone or with an assistant. The possibility of maneuvering the space near the patient and the hydro group, using the convenient handle placed on the delivery arm, allows ample freedom in the movements and in patient assistance procedures. The comfort of the patient in the rinsing phase is in perfect harmony with that of the assistant during work thanks to the cuspidor with 180° rotation. Easy to handle, it is also removable.

The perfect ally

The assistant display console is made of glass with capacitive touch technology: the command keys allow you to manage the unit's functions with a simple touch. The assistant delivery arm is equipped with two cannulas for surgical suction and is designed to accommodate also syringe and curing light. All the instruments are activated automatically and placed on removable and autoclavable supports. The hydro unit is compact and functional thanks to the facilitated movements of both the cuspidor and the upper carter.

Hydro group

Designed to simplify routine maintenance as much as possible, the Nice Glass hydro unit is equipped with a practical slide opening. Simply just rotate the cover to have easy access to the hydro and electronic components, properly separated to guarantee safety and comfort. The technological heart of the unit, it is enclosed in a compact and functional space.

Commands and configuration

The assistant console, intuitive and multi-functional, allows chair movement, activation and timing of hot or cold water to the glass, rinse to cuspidor management, On / Off of the operator lamp and recall of positions. The standard console houses two suction cannulas. It is possible to add an extra two housing for curing light and syringe.

THE BEAUTY OF COMFORT

The details

Small details to improve quality of your work.

HEADREST

Adjustable in height and adjustable on three axes, in skay leather.

ARMREST

The unit is equipped with the comfortable and functional rubber armrest on the left.

WIDE BACKREST

Ideal for those who love working in the 12:00 o'clock position.

SLIM BACKREST

Ideal for those who love working in the 9:00 o'clock position or standing.

The backrests

Ergonomic backrest with lumbar support and depressions designed to guarantee patient comfort and adaptability.

SYNCRO chair

Padded with a soft comfort system and covered in seamless skay eco-leather. The chair has a wide range of operational movements and thanks to the independent and synchronized movement of the back, seat and footrest, it guarantees extreme flexibility. The chair is equipped with 4 anti-crush safety systems.
