

Preparing you for the challenges in dental QA

Ocean

Complete Quality Assurance solutions
for dental X-ray modalities and facilities.

INDEPENDENT X-RAY
QUALITY ASSURANCE

Get the true value of dental X-rays with RTI

RTI's X-Ray portfolio includes tailor-made solutions for dental Quality Assurance.

We offer affordable, holistic solutions for Intraoral, Cephalometric, Panoramic, 3D and CBCT.

Ocean software provides simple-to-use features for routine inspection, through to highly customizable QA programs for deep analysis and record keeping.

Connecting a DAP Chamber to your RTI dental meter or by using a Piranha Panoramic Holder to find the critical position, are both examples of solutions that make the QA work easy and cost efficient.

With the growth in dental X-ray units, it pays to choose a quality assurance provider who will evolve with your needs.
