

**Adhoc®**

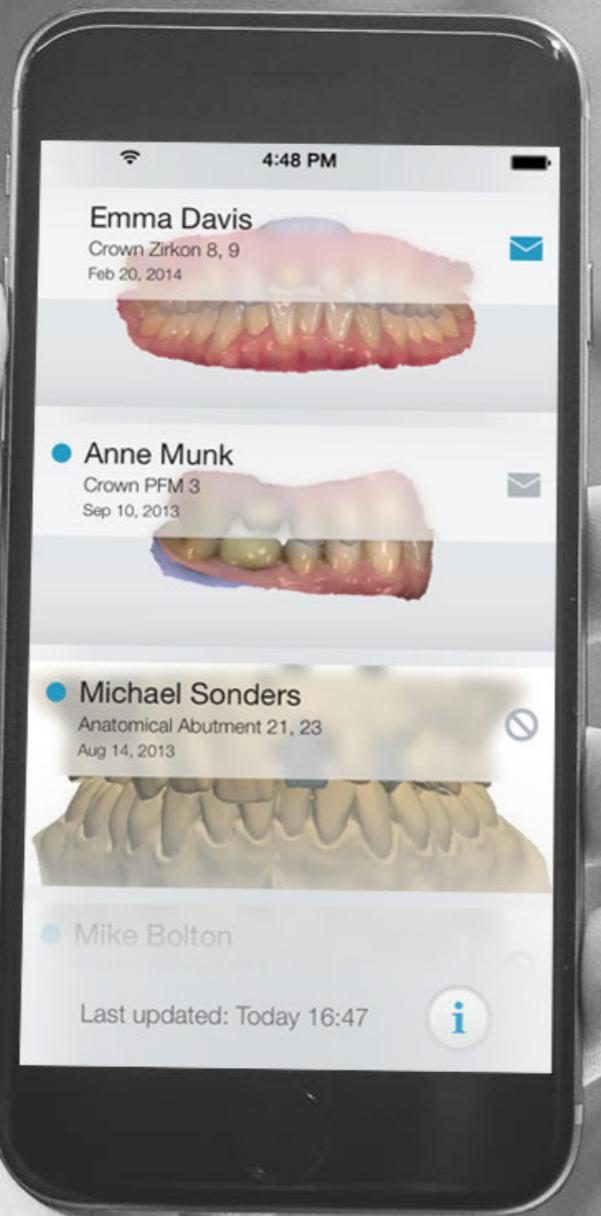

phibo<sup>φ</sup>

# **Adhoc®**

The perfect fit

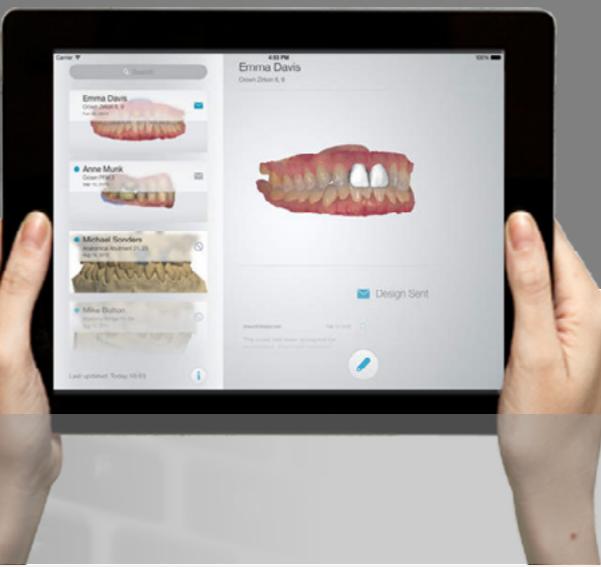

# A unique product

Adhoc® is the ideal product for **screw-retained** restorations. Through an innovative manufacturing process **patented by Phibo®**, we get the best prostheses with **the perfect fit**.

- Fully digital workflow for a 100% customized rehabilitation
- Any type of rehabilitation in Cobalt-Chrome
- On any implant system,

Check Phibo Library to see available implant platforms

A unique product

The perfect fit

# Adhoc® means profitability and simplicity

Adhoc® makes your daily praxis much easier. The **digital workflow** together with **the perfect fit** result in multiple advantages.

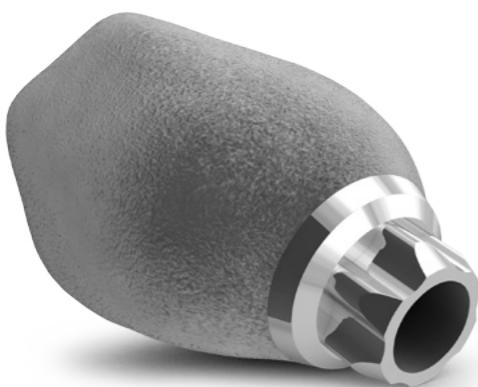

- Less chair time for more patients, which lead into greater profitability
- Simple processes due to the CAD-CAM technology workflow
- Savings in intermediate abutments thanks to implant library

Adhoc® means  
profitability & simplicity

# Exceptional fit

**The milled connection guarantees a perfect fit of final prosthesis.**

The exceptional fit results in a **higher stability in the connection** between the prosthesis and the implant. This provides long-term results in terms of **greater reliability and predictability**.

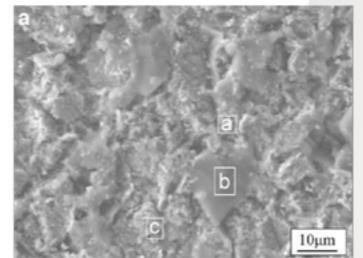

Exceptional fit

Benefits

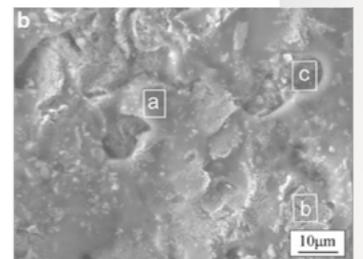

# Excellent aesthetics

## Thanks to an excellent porcelain adhesion.

The rugosity of the laser-sintered surface provides an **excellent porcelain adhesion**. This adhesion is much better than the obtained by a milled surface.<sup>1</sup>.

Cast/milled  
with ceramics

Laser sintered  
with ceramics

Follow ceramic load protocol for Cobalt-Chrome available in [www.phibo.com](http://www.phibo.com)

Excellent aesthetics

Benefits

# Total versatility

**Phibo® Library: the most extensive implant library in the market.**

Thanks to Adhoc®, any type of restoration can be done **on any implant system**.

From single abutments to total edentulous bars, both on implant or abutment level.

## phibo<sup>®</sup> library

Total versatility

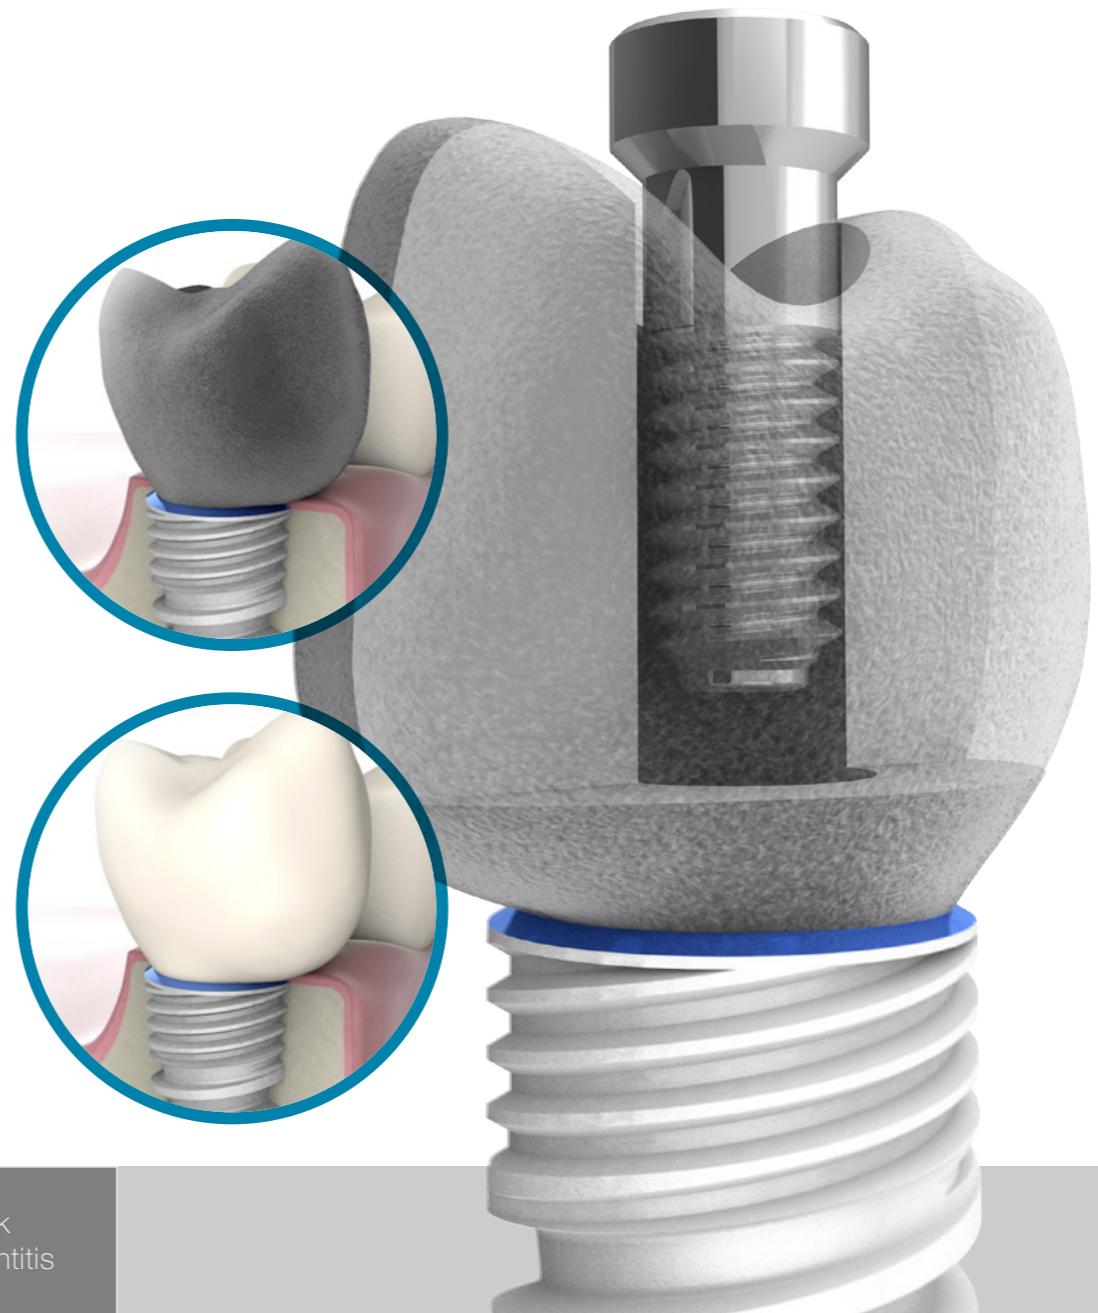

Benefits

# Lower risk of peri-implantitis

**Adhoc® is a cement-free screw-retained solution.**

Retained cement around an implant can lead to peri-implantitis, and in some cases, to implant failure.

Thanks to the Adhoc® solution, **this risk is minimized.**

Lower risk  
of peri-implantitis

Benefits

# Axis<sup>®</sup>: we bend towards a perfect smile

## **The innovative angulated screw channel solution.**

- Up to 20° in any direction
- Both for single and multiple unit restorations
- On implant and abutment level

# Axis<sup>®</sup>: Just advantages for the dentist

- Easy handling and high aesthetics in anterior region
- Gain easy access in posterior regions with the angulated screw channel function
- Increased patient comfort
- Maintaining the same torque (35 Ncm) as with a straight screw channel

# Aurea® Evo & Adhoc®

## “the perfect couple”

**You don't need to stick to only one part  
when you can have it all.**

- **Aurea® Evo**, the exclusively designed implant that maintains the natural aesthetics over time
- **Adhoc®**, the most innovative CAD-CAM prosthetic solution in the market

# Aurea® Evo & Adhoc®

## “the perfect couple”

**The perfect couple provides excellent aesthetics  
in the anterior region.**

- Platform switching restorations,<sup>1</sup>
- Aurea® Evo intermediate abutments available
- Adhoc® provides excellent porcelain adhesion
- Angulated screw channel thanks to Axis®

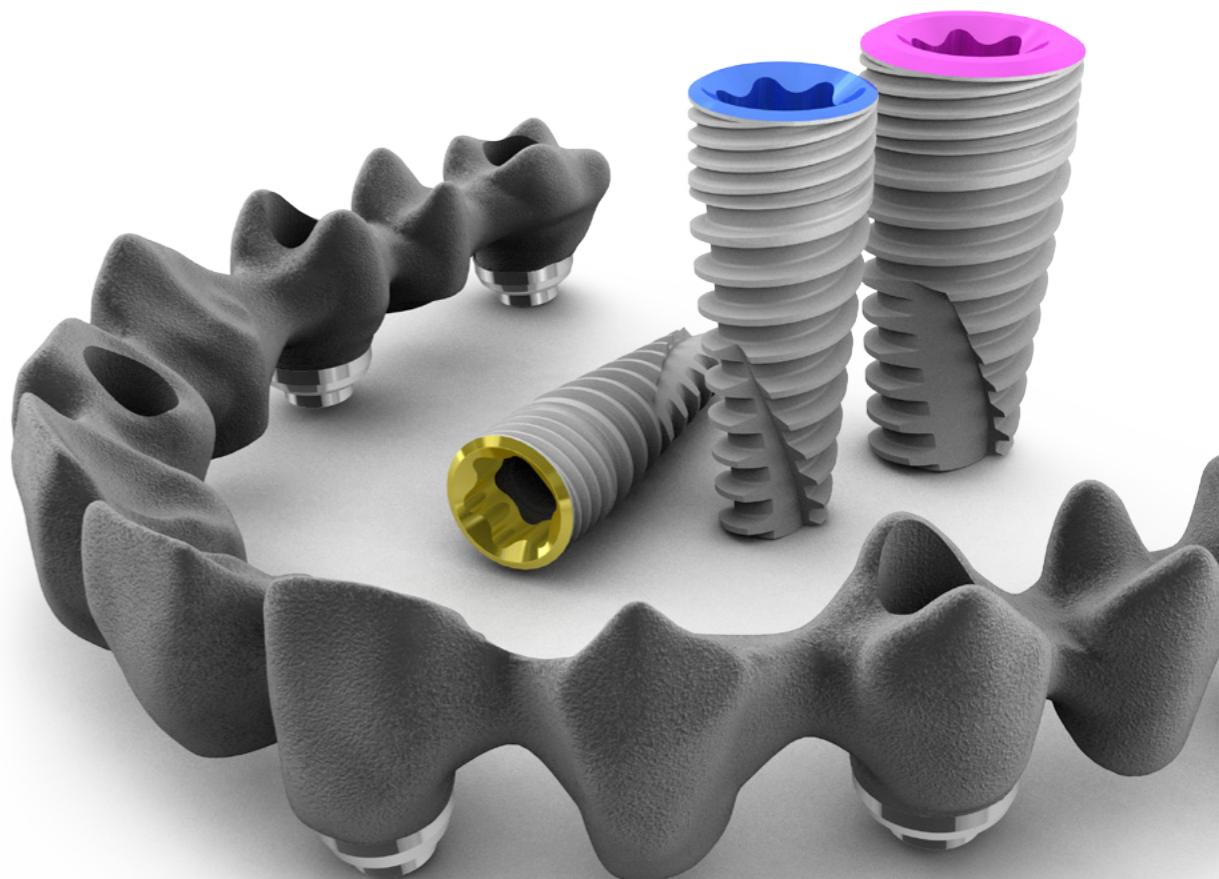

<sup>1</sup> See References section for scientific studies.

# Aurea® Evo & Adhoc®

## “the perfect couple”

**The perfect couple gives you easy access and optimal stability in the posterior region.**

- Easy access with the Axis® angulated screw channel function
- The design of the implant tip and micro threads gives an excellent primary stability,<sup>1</sup>

<sup>1</sup> See References section for scientific studies.
