

phibo^φ

The leading Spanish company
in implantology, prosthetics in CAD-CAM,
digital solutions and services.

About Phibo®

- **7.000 m² of modern facilities** in Sentmenat and Bogotá
- More than **250 employees**
- **Wide product and solutions** portfolio
- **25 technology innovations** in the past **5 years**
- Collaboration agreements with **universities and other scientific entities**
- More than **5.000.000 implants** sold
- More than **1.200.000 prostheses** in CAD-CAM sold
- We adapt to the **needs of our customers**

Phibo® is the leading Spanish multinational in implantology, CAD-CAM prostheses, digital solutions and services.

Phibo® has been researching, developing, manufacturing and selling dental solutions for more than 30 years. It has a strong research vocation and a highly scientific component.

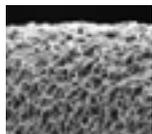

During our history we have accomplished some important milestones that have enabled Phibo® to become a leader in the dental industry. From research and initial development of implants, with the first 100% Spanish patent for dental implant, and the creation of the High Tech Center in 2003, to our international expansion.

Implant Systems

Aurea® Evo

An implant that is rEvolutionary. Designed for tissue care and ideal for preserving natural aesthetics over time. Exclusive hexalobular and conical connection design for the unit implant-prosthesis.

- Indicated for all types of solutions.
- Short surgical sequence.
- Clinical success with the Avantblast® surface.

Avantblast®

The surface that characterises Phibo® implants, contributing to excellent bone-implant fusion stability. Guarantees restoration stability in the short, medium and long term. 10 years follow up studies with Avantblast® Immediate Loading 98,8% success rate.

Exclusive design of a hexalobular and conical connection.

Phibo® is the first Spanish brand of implant systems. Thousands of professionals and more than one million patients rely on our products and services.

- Optimize rehabilitation time due to our Avantblast® surface, facilitating an improved osseointegration.
- Surgical and prosthetic versatility: implant systems for all indications.
- Successful treatments. Preserving the natural aesthetics over the time by exhaustive micro-movement control.

Internal connection

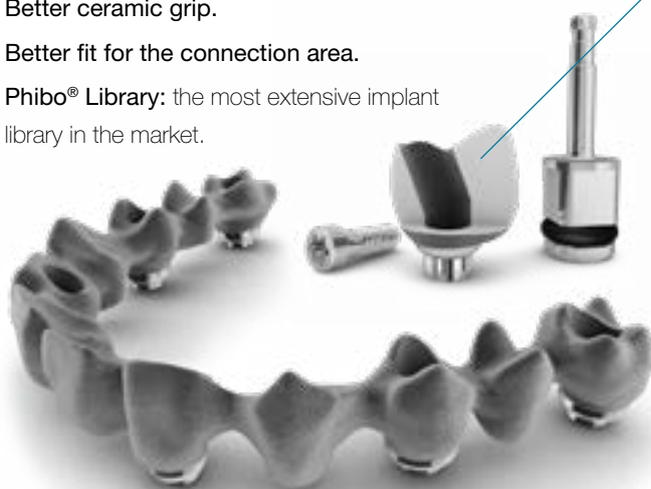

External connection

Phibo® CAD-CAM

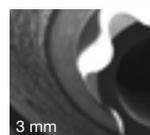

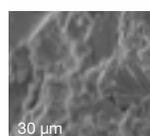

Adhoc®

The most innovative prosthetic solution for screw-retained restorations in Cobalt-Chrome.

- Better ceramic grip.
- Better fit for the connection area.
- Phibo® Library: the most extensive implant library in the market.

Axis®

Removable CAD-CAM partial denture frames

- Pioneers in processes with 100% digital workflow.
- Innovative manufacturing process.
- Delivery time shorter than usual for this type of products.

The CAD-CAM technology has caused a **revolution** in terms of design, production and fitting quality in dental restorations.

The CAD-CAM technology provides:

- Exact precision and fit.
- Highly aesthetic finishes.
- Large variety of materials.

Digital Solutions

Sinergia®

Phibo® Sinergia® is the first digitally integrated dental solution connecting all players within the dental value chain:

CLINIC > LAB > PHIBO® CAD-CAM

- Simplify clinical protocols.
- Reduction of treatment time and resource optimization.
- Avoid repetitions.

Smile5D

A software that allows clinicians to analyse rehabilitations, to simulate surgeries and restorations, and to design new smiles for their patients.

With Smile5D, communication with patients becomes easy as it is done in a very visual way over the patient's mouth.

Phibo® offers an integrated service, from the sale and device start-up until the technical support and continuous training.

Official Distributor
in Spain and Portugal

3shape

Awarded 3D scanners and software for laboratories and dental practices.

Official Distributor
in Europe and LATAM

MEDIT | exocad

The perfect combination of a powerful scanning technology unbeatable speed and flexible software.

Our value proposal

Growth promoters

We promote knowledge and scientific development, so you can **take advantage** and **improve**. **Innovation centered on helping you have happier and healthier patients.**

The complex made simple

We create **advanced solutions**, and offer products and services through a unique and differentiating concept: **We make the complex easy.**

Beauty in excellence

We seek **perfection and create standards of quality**, predictability and aesthetics. **Phibo® always tries to excel and achieve.**
