get ready to win.

therma / tecar therapy.

therma. tecar therapy.

therma is a new equipment for Therapeutic Resistive and Capacitive Diathermal non invasive treatment and which is prompt to generate, with the best effectiveness and without pain, endogenous hyperemia for draining and stimulate blood circulation in all the different cellular layers for lymphatic drainage, anti-inflammation effects, circulation improvement and pain reduction. Stimulate the natural and physiological body reaction to the pathology and accelerates reparative processes, thanks to special applicators is able to deliver the proper energy into the different cellular layers.

Therapeutic Resistive and Capacitive Diathermal treatment is the recent and more effective approach in diathermy treatment for all the professional operators who are looking for something more than a traditional diathermy unit (microwaves or shortwaves). Therapeutic Resistive and Capacitive Diathermal is the technological and therapeutic evolution providing versatility, effectiveness, therapeutic benefits that are hardly to achieve with the traditional diathermy devices. The treatment is like a massage during which it is possible to deliver energy to the patient who feels a comfortable warm.

caratteristiche

Max Power
150W/250VA
Working frequencies
500 kHz/1 MHz
Operative mode
Resistiva/Capacitiva
Power supply (Vac/Hz)
90-240/50-60
Electrical input power (VA)
300

What's news

- High luminosity touchscreen display
- Intuitive icons interface
- Controls of the unit made by one knob
- Multipurpose encoder, keys or touchscreen
- Stored protocols inside
- Customized programs
- Possibility to upgrade through USB port
- Six languages software

therma,
