*ODP Ltd. develops a cutting-edge delivery system for use in the oral cavity. It is designed for the sustained release of Medications & Nutraceuticals.*

## The Challenge:

Currently, there are no effective mechanisms for long-term sustained local delivery to the oral cavity and upper GI tract. There is a need for a controlled release of medications and nutraceuticals that improve oral and systemic health.

Specifically, conditions that currently lack satisfactory solutions include:

- Oral cavity diseases:
  - Halitosis (Bad Breath)
  - Oral Candidiasis (Oral Thrush)
  - Xerostomia (Dry Mouth)
  - Head & neck and mouth cancer
- Autoimmune diseases
- Orthodontic diseases

Current local oral treatments are dissolved by the saliva and swallowed quickly, and do not stay in the oral cavity.

## The Solution: ODP

- An innovative new platform for intra-oral delivery of drugs and nutraceuticals
- Extended time-controlled release
- Non-invasive
- Disposable
- Bio-compatible
- Reduced adverse drug reactions compared to current treatments
- Improved patient compliance - self-administered & easy to use
- Designed for convenient use and withstands the oral environment

## Prototypes & Possible retention/use ways:

Proprietary, confidential Information

## Milestones:

- Platform prototypes available
- Anti-Candidiasis drug – In vitro stage completed
- Evaluation of additional candidate drugs in progress
- New IP in the preparation stage
- Compliance tests completed

## Major Markets

**Medications** - Oral drug delivery-retaining controlled levels of medication for extended periods.

**Nutraceuticals** - Oral care - Vitamins, Minerals & Supplements.

## Team

**Mr. Sergio Moskovitz**  
Co-founder, CEO and Director

**Mr. Amnon Engelberg, LLb, MBA**  
Co-Founder, Director

**Prof. Michael Friedman**  
CSO

**Joshua Wolfson**  
Co-Founder, CTO
