Hi! I'm Tiffany, inventor of Retainer Buddy and Retainer Container. As the mother of two teenage boys, I created Retainer Buddy to solve the problem of wet retainers and orthodontic aligners (like Invisalign®) being left around the house. They are constantly being left on bathroom sinks, bedside tables, kitchen counters, and coffee tables, and run the risk of being lost or accidentally thrown out. Retainers and aligners are very expensive, and I wanted to come up with something fun that you would want to use. I think we nailed it!

Retainer BUDDY

Our Retainer Buddy is a fun, convenient, and sturdy holder for retainers and orthodontic aligners (like Invisalign®). Keeps retainers and aligners safe and off household surfaces during eating and tooth brushing. Fun characters for every interest and age level!

Retainer container

Why use the boring retainer case you got free from the dentist when you can have coolest case around? Lullubee Labs Bamboo Retainer Containers are mirrored safe storage cases with beautiful full color, on-trend designs! Made from natural bamboo fiber, a tough chemical-free material. Easy to keep clean with warm soapy water.
